Connectivity That Empowers Commerce

FOOD, FUEL, FINANCIAL SERVICES.
HEALTHCARE, COMFORT, CLOTHING.
OUR NATION'S BUSINESSES
PROVIDE US THE GOODS AND
SERVICES ESSENTIAL TO DAILY LIFE.
AND TODAY'S NETWORKS PLAY A
CRUCIAL ROLE IN NEARLY EVERY
TRANSACTION. THAT'S WHY SAGENET
PROVIDES CONNECTIVITY THAT
EMPOWERS ENTERPRISES TO DELIVER
PRODUCTS AND SERVICES EFFICIENTLY,
EFFECTIVELY AND SECURELY.

Managed Network Solutions

For Multi-site Enterprises

SageNet designs, implements and manages secure communication networks for many of the nation's leading retailers, financial services firms, healthcare providers, energy companies, public utilities and government agencies. Our passion for technology and unwavering commitment to exemplary customer service provides you a single source of accountability that ensures your network is reliable, cost-effective and secure.

Every SageNet-optimized network is designed to the client's needs, not the carrier's offerings. Unlike other Managed

Service Providers, SageNet is completely vendor and technology neutral.

This independent approach—backed by over three decades' experience and a state-of-the-art, nationwide service

and support organization—frees us to provide better network connectivity while lowering the total cost of ownership.

And we deliver it all with the peace of mind that comes from having a single point of contact for everything from implementation and management, to security and support.

Value: A Better Return on Network Investment

SageNet's managed network solutions optimize one of today's most vital corporate assets... the network. From Big Box Retail to C-stores to Food Services, Finance and Insurance to Healthcare or Hospitality, SageNet has helped hundreds of businesses enhance the customer experience while increasing their return on network investment.

The network landscape has changed over the last few years providing excellent opportunities to increase speed and coverage, while reducing costs. For a no-obligation network check-up, visit www.sagenet.com/enterprise or call 866.480.2263.

Connect Series of Network Services

SageNet's Connect Series brings clarity to managed network services by providing customers a suite of services packaged according to the customer's precise needs. SageNet's Connect Series allows customers to select the ideal level of services for their specific operations, environment and budget:

- **SageNet ClassicConnect™** - Cost-effective, high-speed connectivity to every site in your network
- **SageNet ManagedConnect™** - High-speed connectivity, network monitoring, alert notification, and analytics
- **SageNet CompleteConnect™** - Network design, VPN connectivity, complete management & support

MPLS Network

In addition, SageNet's unique MPLS Network can be deployed for any last-mile access technology like Cable, EoC, Fiber, DSL, 4G and VSAT. SageNet's MPLS Network offers the redundancy, resiliency and Quality of Service (QoS) needed to securely and cost-effectively maximize performance of critical applications. The combination of MPLS with QoS traffic management allows our customers to prioritize traffic based on application or location.

Value-add Services

SageNet offers a variety of value-add services to maximize network ROI, including:

- **Unified Threat Management** including Anti-Virus, Anti-Spam, IPS/IDS Data Leak Protection, Content Filtering, and Secure Remote Access
- **Digital Signage Services** offering end-to-end solutions from system design and infrastructure installation, content management to 24/7 display-level monitoring
- **Managed Wi-Fi and Data Analytics** including Rogue Detection, Professional and Premium Services
- **PCI Compliance Services** including PCI Scans & SAQ Assistance, PCI WAP Scanning, SIEM Logging
- **Unified Communications as a Service** facilitates collaboration and integrates all your real-time communications – VoIP, video, mobile, and more
- **Network-based Premises Security Services** provide integrated video surveillance and physical access control

SageNet offers a comprehensive suite of managed network services and support options. From SLAs to network management tools to complete network monitoring and support, a SageNet-managed network is an optimized network 24x7x365.

Managed Network Solutions

The SageNet Advantage

For businesses with nationwide locations, a SageNet-managed network provides greater network value by reducing network costs, increasing network performance and security, and enhancing the customer experience. The SageNet Advantage brings you:

- Unparalleled Expertise, Technology, Resources and an Unwavering Commitment to Exemplary Customer Service
- The Broadest Range of Coverage and Service Options at the Lowest Total Cost of Ownership
- Our Customer Connect Portal: Real-time Network Intelligence to Strategically Monitor and Manage Your Network
- Full Lifecycle Management, Single Source of Accountability and Peace of Mind
- Experience: Over three decades' Proven Results in Managed Services
